■ Introduction

The EtherCAT slave ECAT-2074A is an absolute encoder master. ECAT-2074A provides four channels. Each channel is independent of each other. It supports two serial transmission interfaces: SSI (Serial Synchronous Interface) & BiSS-C (BiSS Continuous Mode). ECAT-2074A also supports a maximum transmission frequency of 10MHz, a maximum transmission bit of 48bit (Including error bit, warning bit, CRC in BiSS-C mode), and Automatic compensation of cable delays in BiSS-C mode. The maximum cable length supported is 70 meters.

■ Application

- Precision Position Measurement
